100 years ago, a series of studies about the education of health professionals, led by the 1910 Flexner report, sparked groundbreaking reforms. Through integration of modern science into the curricula at university-based schools, the reforms equipped health professionals with the knowledge that contributed to the doubling of life span during the 20th century.

Health professionals for a new century: transforming

Education is the process of facilitating learning, or the acquisition of knowledge, skills, values, beliefs, and habits. Educational methods include storytelling, discussion, teaching, training, and directed research. Education frequently takes place under the guidance of educators, but learners may also educate themselves. Education can take place in formal or informal settings and any ...

We believe that learning is joyful and lifelong. By creating inquiry-based experiences and tools that spark wonder; offer hands-on experiences; and encourage questions, explorations, and individual discovery, we're transforming the way that people learn. Learning this way empowers people to figure things out for themselves—about science, but also about any topic, claim, or idea.
