On my most recent assignment I was faced with the challenge of downloading a pdf file from an API and

displaying it in the browser. Normally, the API would provide a json-object with a link to the pdf, which can then be used to open a new browser tab/window and the browser or platform takes care of the rest.

How to open a pdf downloaded from an API with JavaScript

Overview []. Client libraries contain code that developers can use to help with common and basic tasks, so that they don't have to write the code from scratch when their projects interact with an API.
