Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

vii Preface The first edition of my Disorders of Personality text (1981) was widely regarded as the classic book in the field. Given its coordination with a theory of personality and psychopathology and with the then newly published DSM-III, it gained immediate acceptance among mental health professionals, the audience for which it was intended.

I made tiny gingerbread houses that are meant to be perched on the edge of a mug of hot chocolate. I had been thinking about those sugar cubes that hook on the rim of a teacup earlier this month, and I was also thinking about 3-D cookies and how they fit together and figured it would be pretty neat to make cookies that hang on the edge of a mug. I thought I was being so brilliant but it only ...
